PROFILE

Highly skilled Front-End Engineer with 4+ years of professional experience, specializing in building robust, user-focused, and scalable web applications with Angular, NgRx, and TypeScript. Proven ability to enhance complex enterprise solutions and lead framework transitions, with a strong emphasis on performance optimization and consistent interface design. Adaptable in collaborative, fast-paced environments and eager to contribute to innovative projects requiring strong Angular expertise.

PROFESSIONAL EXPERIENCE

TeamWave — Lead Front-End Engineer (8th Feb 2021 – 15th December 2024)

Key Projects

- **TeamWave E-Signature:** Developed complete e-signature functionality using **Angular** and **NgRx**, integrating the Stripe payment gateway for secure payment processing and subscription management. Designed the interface with Tailwind CSS and primeng, delivering a clean, **responsive UI** and ensuring **seamless API integrations**.
 - **TeamWave CRM:** Enhanced CRM experience with advanced front-end solutions using **Angular 17**, **NgRx**, PrimeNG, and AG Grid, significantly contributing to performance optimization and interface consistency. Utilized Nx monorepo architecture, demonstrating ability to **scale applications through modular implementation**.
 - **TeamWave PM:** Built and maintained features for the Project Management module using **React** and **redux**, focusing on task handling, team collaboration, and project tracking. Implemented reusable and scalable components for core functionalities
 - **TeamWave Dashboard:** Worked on the internal dashboard application powered by Angular, utilizing component-level NgRx for localized state management. Developed UI components using Angular Material, ensuring design consistency, responsiveness, and accessibility across the app.
 - **Unbanking.io:** Led the design and development of the Unbanking.io landing page using **Next.js** and Tailwind CSS, showcasing end-to-end project ownership from design to implementation..
 - **Personal Projects:** Created prototypes of Medium, Paytm, and Zapier using React and Redux to enhance learning and problem-solving skills.
-

PERSONAL PROJECTS

EchoWrite – Personalized AI Chat App - <https://echowrite.app/login>

<https://github.com/john-hashim/echowrite>

An AI-powered chat application that adapts to user tone and remembers past conversations for a natural, context-rich experience.

- Developed a full-stack AI chat app with **Google OAuth** authentication and **Redis**-based session persistence.
- Implemented tone-adaptive responses using Google Generative AI and chat memory using Redis for context-aware continuity.
- Built a responsive and accessible UI using **React**, **Tailwind CSS**, **shadcn/ui**, and **Zustand** for state management.
- Integrated Nodemailer for email notifications and **PostgreSQL** with **Prisma ORM** for scalable and type-safe data handling.
- Deployed scalable backend using Node.js, with seamless Google OAuth integration for secure sign-in.
- Deployed the project on an AWS EC2 instance, demonstrating working knowledge of Linux server setup, firewall configuration, and process management.

Tech Stack: React, TypeScript, Zustand, Tailwind CSS, shadcn/ui, Node.js, Redis, PostgreSQL, Prisma, Google Generative AI API, Google OAuth, Nodemailer

TECHNICAL SKILLS

- Frontend Development: Angular (17, 13), RxJs, React, Redux, Next.js, TypeScript, HTML, CSS, JavaScript
 - State Management: NgRx, Redux
 - UI Frameworks: Tailwind CSS, ShadCN, PrimeNG, Angular Material, SyncFusion, Bootstrap
 - Version Control: Git
-

EDUCATION

Bachelor of Computer Science and Engineering
APJ Abdul Kalam Technological University
Aug 2015 – Jul 2019

ACHIEVEMENTS

- Played a pivotal role in transitioning TeamWave's front-end to Angular 17.
 - Successfully improved app scalability through modular monorepo implementation.
 - Contributed to HR management tools, enhancing user engagement and experience.
